

City system

City AEB can avoid low-speed impacts in city traffic up to 20km/h.

Inter-Urban system

Inter-Urban systems operate over the speed range 50-80km/h but may also provide useful mitigation at lower speeds, typical of an urban environment.

Pedestrian system

Pedestrian systems can detect pedestrians and other vulnerable road users like cyclists.

- = AEB is standard equipment. Buy with confidence
- = AEB is an option. Take care when buying to ensure AEB is included
- = AEB is unavailable
