Comments

The passenger compartment of the X-Class remained stable in the frontal offset test. Dummy readings showed good protection of the knees and femurs of the driver and passenger. Mercedes-Benz demonstrated that a similar level of protection would be provided to occupants of different sizes and to those sat in different positions. In the full-width rigid barrier test, protection of the driver and rear passenger was good or adequate for all critical parts of the body. In the side barrier impact, protection of all critical body areas was good. Even in the more severe side pole test, protection of the chest was adequate and that of other parts of the body was good. Tests on the front seats and head restraints demonstrated good protection against whiplash protection in the event of a rear-end collision. However, a geometric assessment of the rear seats indicated poor whiplash protection. The standard-fit autonomous emergency braking system scored maximum points in tests of its functionality at the low speeds, typical of city driving, at which many whiplash injuries are caused.

Comments

In the frontal offset test, protection of the chest of the 6 year dummy was rated as marginal, based on chest decelerations. Otherwise, protection of the 6 and 10 year dummies was good or adequate. In the side barrier test, protection of both child dummies was good for all critical parts of the body. The X-Class has a system that automatically disables the front passenger airbag when a rearward-facing child restraint is used in that seating position. Mercedes-Benz showed that the system worked robustly and it was rewarded. The restraint used to assess Group I ISOFIX restraints required a multi-stage installation procedure. Otherwise, restraints could be properly installed and accommodated in the vehicle.

System Name	Active Brake Assist
Type	Auto-Brake with Forward Collision Warning
Operational From	10 Km/h
Additional Information	Defaults on for every journey; operates above 40km/h and in low ambient light

PERFORMANCE ■	Autobrake Function	
	Avoidance	Mitigation
Running Adult crossing from Farside	Collision avoided up to 50 km/h	Impact mitigated up to 60 km/h
Walking Adult crossing from Nearside -25%	Collision avoided up to 45 km/h	Impact mitigated up to 60 km/h
Walking Adult crossing from Nearside -75%	Collision avoided up to 60 km/h	Impact mitigated up to 60 km/h
Running Child from behind parked vehicles	Collision avoided up to 35 km/h	Impact mitigated up to 45 km/h

Comments

The protection provided by the bonnet to the head of a struck pedestrian was predominantly adequate or marginal. Protection of pedestrians' legs was good or adequate. The pedestrian-detecting autonomous emergency braking system performed well in Euro NCAP's tests, with collisions avoided or mitigated at most test speeds.

SAFETY ASSIST

Car in front brakes gently	Avoidance	Avoidance
Car in front brakes harshly	Mitigation	Mitigation
FOLLOWING A CAR AT LONG DISTANCE		
Car in front brakes gently	Avoidance	Avoidance
Car in front brakes harshly	Avoidance	Avoidance

Comments

The X-Class has a standard seatbelt reminder system for the front and rear seats. The speed assistance system identifies the local speed limit and provides this information to the driver who can then set the limiter accordingly. A lane assistance system warns the driver when the vehicle is drifting out of lane. The autonomous emergency braking system performed well at highway speeds, with collisions avoided or mitigated in all test scenarios.
