Technical Bulletin

Child Restraint Systems for Installation Checks

Version 3.1

November 2019
TB 012
1. Child Restraint Systems for Installation Checks

From 2013 onwards, Euro NCAP uses a selection of popular Child Restraint Systems (CRS) to assess the vehicle’s ability to safely and correctly accommodate child seats. This list contains a sample of widely available, well performing child seats that represent most common types of products available on the European market. The list will be checked annually and updated if seats are no longer available on the market. Each update will occur at the start of the year preceding the year of application.

Euro NCAP does not assess or rate the child seats individually and although the child restraint systems on the top pick list are generally recommended, there are other seats available on the market that provide equal protection.

1.1 Definitions

**R44 groups:**
Group 0+: Infants until 13kg (approx 12 to 18 months)
Group 0+/I: Infants / toddlers until 18kg (approx 3.5 yr)
Group I: Toddlers 9 -18kg (approx 1 – 3.5 yr)
Group II/III: Children from 15 kg onwards (approx 3 yr)

**i-Size CRS**
45-75 cm: Birth to approx. 12 months
45-105 cm: Birth to approx. 4 years
61-105 cm: approx. 4 months to 4 years
76-105 cm: approx. 9 months to 4 years
100-135 cm: approx. 4 years to 8 years

1.2 CRS for Installation Assessment

The versions of the CRS to be used in the installation assessment are specified in Section 1.3. Each CRS will be installed using the installation mode detailed in the tables below.

1.2.1 Universal Belted CRS

<td>B I _ _</td>
</tr>
</tbody>
</table>

1.2.4 CRS adjustments

Any comfort adjustments on the CRS shall be changed up to a maximum stature of 135cm. The following adjustment shall be used:

- Kidfix XP, the installation will be assessed with the height adjustment set to the 8th notch up from the bottom equating to a stature of 135cm, where the lowest position is notch 1.
- BeSafe iZi Flex FIX, the installation will be assessed with the height adjustment set up from the bottom with five complete rotations of the adjustment, equating to a stature of 135cm, where the lowest position is number 1.

Where the vehicle manufacturer recommends any CRS and boosters the settings/adjustments for each applicable child stature shall be provided to Euro NCAP.

2. Child Restraint Systems for Dynamic Testing

For both child dummies, the requirements detailed in the Euro NCAP COP Assessment protocol, Section 3.1.3 relating to stature, CRS adjustment and integrated CRS must be followed.

2.1 Q6 Dummy
2.1.1 The Q6 dummy will be placed in a forward facing CRS only, rearwards facing CRS are NOT accepted.
2.1.2 The vehicle manufacturer may recommend a CRS for the Q6. Any belt guides, such as the Kidfix² R lap belt (secureguard), shall only be used providing there is clear information in the vehicle handbook instructing the user to install the CRS with the guide.
2.1.3 Where the vehicle manufacturer does not recommend a FWF CRS for a six year old child, the front MPDB and Side AE-MDB impacts will be performed with the Q6 dummy seated in a Britax Römer Kidfix XP installed using the ISOFIX anchorages and adult belt.
2.1.4 Where the vehicle offers no ISOFIX anchorages, the Kidfix XP will be installed using the adult belt only. The CRS height adjustment shall be set to the 4th notch up from the bottom, where the lowest position is notch 1.

2.2 Q10 Dummy
2.2.1 The vehicle manufacturer may recommend a booster cushion for a ten year old child (either stand-alone or as part of a booster seat with detachable backrest).
2.2.2 Where the vehicle manufacturer recommends to the public the use of the high back version of either the Kidfix XP, Kidfix² R or Takata Maxi for the Q10, the tests will be performed with either the booster cushion only with backrest removed or a booster cushion from the list below.
2.2.3 Where the vehicle manufacturer does not recommend booster cushion, the front MPDB and Side MDB impacts will be performed with the Q10 dummy seated on a booster cushion (only) selected from the list below by the vehicle manufacturer, where no selection is made the Secretariat will choose at random.
2.2.4 Q10 Dummy CRS
Britax Roemer Kidfix² R – approval number ECE R44: 04301304
Where the Kidfix² R booster cushion is to be installed in Euro NCAP tests, the lap belt guide shall only be used where the OEM recommends this CRS to the public and there is clear information in the vehicle handbook instructing the user to install the CRS with the guide.
Fischer Price Safe Voyage – approval number ECE R44: E2 0407296.
To be removed from this list for 2021 assessments.
Graco Booster Basic
Where the Graco booster is to be installed in Euro NCAP tests, the seat belt clip must NOT be used under any circumstance. The adjustable arm rest shall be positioned to the highest position.
Nania/OSANN Dream - approval number ECE R44: E2 - 0403011
Nania/OSANN UP - approval number ECE R44: E2 – 049027
Nania/OSANN Junior – approval number ECE R44: E24 – 04148
Peg Perego Viaggio 2-3 Shuttle – approval number ECE R44.04: E24 - 0000256
