DETAILS OF TESTED CAR

SPECIFICATIONS

Tested model	Subaru XV, 2.0i, LHD
Body type	5 door hatchback
Year of publication	2012
Kerb weight	1435kg
VIN from which rating applies	applies to all XV's of the specification tested

SAFETY EQUIPMENT

Front seatbelt pretensioners	
Front seatbelt load limiters	
Driver frontal airbag	single stage
Front passenger frontal airbag	single stage
Side body airbags	
Side head airbags	
Driver knee airbag	
Electronic Stability Control	
Seatbelt Reminder	driver, passenger and rear seats

COMMENTS

The rating of the Subaru XV has been upgraded from 2011 to 2012. The car is unchanged and test results have been carried over from the previous year. The 2012 rating reflects the performance of the XV against Euro NCAP's latest requirements.

Adult occupant

In the frontal impact, the passenger compartment remained stable. However, there was rupture of several spot-welds in the driver's footwell and the car was penalised. Subaru have informed Euro NCAP that they have made improvements to the welding in this area. Dummy readings indicated good protection of the knees and femurs of the driver and passenger. However, structures in the dashboard were thought to pose a risk to occupants of different sizes and to those sat in different positions. In the side barrier test, the XV scored maximum points with good protection of all body areas. However, in the more severe side pole test, dummy readings of rib compression indicated weak chest protection. The seat and head restraint provided good protection against whiplash injuries in the event of a rear-end collision.

Child occupant

Based on dummy readings in the dynamic crash tests, the XV scored maximum points for its protection of the 18 month infant. In the frontal impact, forward movement of the 3 year dummy, sat in a forward facing restraint, was not excessive. In the side impact, both dummies were properly contained by their restraints, minimising the possibility of dangerous head contacts. The front passenger airbag of the XV is by default off, allowing a rearward facing child restraint to be used in that seating position. The airbag is turned on only when an occupant of a suitable size is detected in the seat. The system met Euro NCAP's requirements and was rewarded.

Pedestrian

The bumper scored maximum points for its protection of pedestrians' legs. However, the front edge of the bonnet was poor in all areas tested and scored no points. In most areas where a child's head might strike, the bonnet provided good protection. However, the protection provided in those areas where an adult's head would strike was predominantly poor or marginal.

Safety assist

Electronic stability control is standard equipment on the XV, as is a seatbelt reminder system for the driver, passenger and rear seats. A speed limitation device is not offered on the XV.
